

Article 53 # Non-Binding Resolution – Protecting Acton's Potable Water

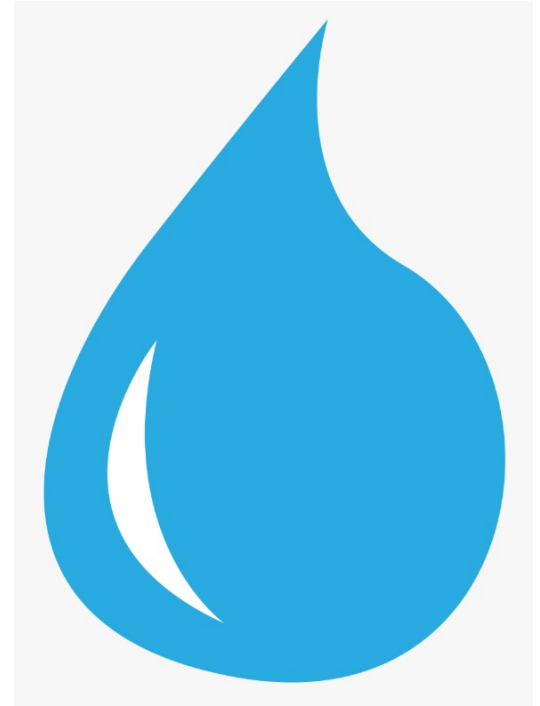

Please vote YES to declare that:

“Protecting Acton's potable water should be a higher priority than promoting/encouraging additional water uses”

The question is...yes or no...

“Protecting Acton's clean drinking water should be a higher priority than enabling and facilitating additional water uses without a plan for clean water for all.”

The answer seems
obvious right?

Water is life...

So why bother with this
decision?

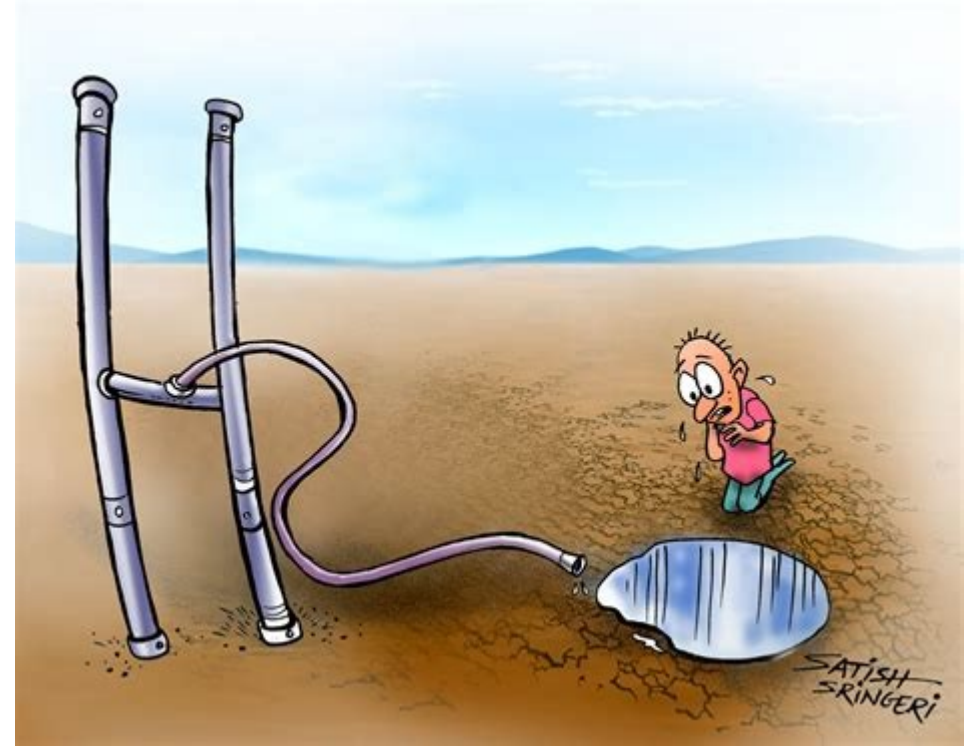

Sometimes it's important for Town Meeting to set priorities so that competing interests in the town understand the voters priorities...

We know water is limited:

- aquifer limits
- well pumping limits
- etc

But this vote isn't about water quantity

*The **decision today** is whether to **prioritize protecting** Acton's water quality when decisions have to be made*

This article, is non-binding.

This article, if passed, would not change law. This article, if passed, would NOT commit the town to anything.

However, if passed, we hope that the Acton Select Board will respect Town Meeting's vote on this matter and invest more time and resources into protecting Acton's drinking water.

***Vote YES! To PROTECT
ACTON's DRINKING WATER...***

***To declare that: “Protecting Acton's potable water should be a
higher priority than promoting/encouraging additional water uses”***
